TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, C, SQL, HTML5, CSS3
Frontend: React.js, Redux, Context API, Tailwind CSS, Material UI
Backend: Node.js, Express.js, RESTful APIs, MongoDB, Redis, JWT
Tools: Docker, Git, GitHub Actions, CI/CD, Vercel, Render
Concepts: MVC Architecture, Scalable Code, State Management, UI/UX, OOP, DSA

PROJECTS

- UnityRent** | *MERN, AWS S3, JWT, Material-UI* Mar. 2026 – Present
- Engineered a scalable P2P rental marketplace leveraging the **MERN stack** and **AWS S3** for cloud-native asset storage, enabling secure academic resource sharing for university environments.
 - Integrated high-integrity **transactional workflows** with payment gateway APIs and custom **escrow logic**, ensuring financial accountability and reducing peer-to-peer disputes by design.
 - Architected a responsive, cross-platform interface using **React.js**, implementing **Role-Based Access Control (RBAC)** and Student ID validation to enforce strict security protocols and user trust.
- Jal Drishti** | *Computer Vision, QGIS, Sentinel-2, Python, VR* Sept. 2025
- Engineered a **Geospatial Decision Support System** using **Sentinel-2 multi-spectral imagery** and **QGIS** to automate the evaluation of Rooftop Rainwater Harvesting (RTRWH) and hydrological recharge potential.
 - Developed a **U-Net and Mask R-CNN pipeline** for high-precision rooftop segmentation (90%+ accuracy), integrating **VR visualization** to simulate runoff patterns for urban sustainability planning.
- The Roaming Hub** Live | *MERN, Python, Gemini 1.5, ChromaDB, GitHub Actions* Aug. 2025
- Architected a **distributed microservices ecosystem** separating a Node.js engine from a Python AI service, utilizing **Mapbox GL JS** for geospatial property visualization and interactive mapping.
 - Engineered a **RAG (Retrieval-Augmented Generation)** pipeline using **ChromaDB** and **Gemini 1.5 Flash**, enabling hallucination-free AI recommendations through semantic vector search of the property database.
 - Automated deployment workflows via **GitHub Actions CI/CD pipelines**, containerizing services with **Docker** to ensure high-availability and seamless synchronization between the web and AI microservices.

EXPERIENCE

- Tech Team Lead** | *Hail Jarvis CSE Club* Aug. 2025 - Present
- Directing the technical infrastructure for campus-wide hackathons and workshops, overseeing end-to-end logistics, automated judging systems, and mentorship pipelines
 - Leading technical coordination and cross-functional team efforts to execute large-scale events, managing sponsorship outreach and digital platforms to drive a 40% increase in student engagement.

EDUCATION

- University Institute of Engineering and Technology, Kurukshetra** Aug. 2023 – May 2027
B.Tech in Electrical and Computer Engineering *Current CGPA: 8.26/10*

ACHIEVEMENTS

- 2nd Runner Up, TechJam 2.0:** Secured 3rd position among 1,600+ teams at Microsoft Sovereign Office, Noida (Organized by Code Rangers).
- Top 10 Finalist, HackGround India 2K25:** Ranked in the top 10 out of 3,000+ teams at ThoughtWorks Office, Gurugram (Coordinated by TechVerse Nexus and Unstop).
- Top 15 Finalist, Hackamania:** Achieved Top 15 rank out of 2,000+ teams at Microsoft Office, Gurugram (Organized by The Elites and Reskill).
- Level 1 Qualifier, Flipkart GRID 7.0:** Qualified for the national-level tech challenge (2025), demonstrating strong algorithmic aptitude and problem-solving skills among thousands of participants.
